NJM Personal Auto Policyholders to Receive an Additional Refund on Premiums

In light of the persistence of COVID-19, we continue to see a reduction in driving for the majority of our policyholders.

Recall that in April, to recognize this reduced exposure, NJM returned a portion of auto policy premiums to its personal auto insurance customers through the NJM Policyholder Relief Program. Policyholders received a 15% refund on the equivalent of three months of annual premium payments in recognition of their reduced driving over this period.

Coronavirus
UPDATE

We are pleased to share that NJM will be providing a second round of refunds to policyholders in the amount of 15% for two months' worth of premium.

In the coming weeks, policyholders will receive the refund either by check or as a credit to a bank account.

Thank you again for all of your efforts during this time.
