Just take a few minutes to complete this form, then return it to **New Jersey Manufacturers Insurance Group** in the enclosed envelope. You'll promptly receive a FREE, computer analysis of the various costs to replace YOUR house...to help make sure you're properly covered.

Home Phone

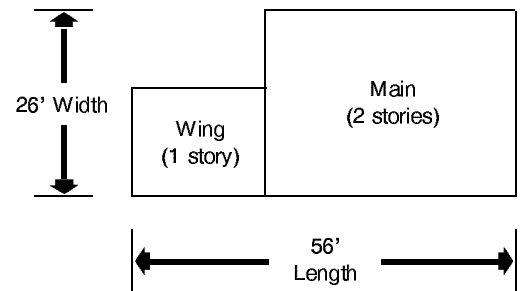

Business Phone

Measure the exterior of your home as accurately as possible following the method described below. **DO NOT** include measurements for a garage, porch or deck under the wing column; this information may be entered in the appropriate area(s) on the reverse side of this form. Information you may have previously provided, or we may have obtained from an inspection of your residence, may appear in areas of this form. Please review the information, make adjustments where necessary, and answer each question applicable to your home.

How to properly measure your house

WRONG

Choose the residence style which most closely describes your home from category A or B or C below and provide the information requested.

A. Ranch Victorian Row/Town House End Unit
Cape Cod Contemporary Center Unit
Colonial

	Main	Wing	Wing
Length			
Width			
No. of Stories			
Basement - % of Ground Floor			
% of Basement Finished			
Crawl Space - % of Ground Floor			
Pilings - % of Ground Floor			

B. Bi-level
Raised Ranch

Length		
Width		

Enter % of Bottom Floor which is **unfinished** (excluding Built-in Garage)

--	--

C. Split-Level

	1 Story	2 Stories
Length		
Width		
Basement - % of Ground Floor		
% of Basement Finished		
Crawl Space - % of Ground Floor		

For each question below, select the most representative item(s) found in your home. Each question will ask you to identify the specific material and to indicate the percentage (%), square footage (Sq Ft) or count (#) of the item. If a material is not listed, be sure to identify the feature and quantity of the item in the Other area.

Kitchens & Bathrooms

Because every kitchen and bathroom is unique, a representative description of each type is included below. Please select the description which most closely matches your kitchen and bathrooms. Indicate the quantity of the feature in the bracketed area; for example (1). When determining whether a bathroom is full or half use 3 fixtures (example tub, toilet and sink) as an indicator of a full bath; less than 3 fixtures would be considered a half bath.

Kitchens

<p>Standard Kitchen ()</p>	<p>Up to 24' of standard quality cabinets and countertops; range/oven; range hood/exhaust fan; dishwasher; sink; microwave.</p>
<p>Custom Kitchen ()</p>	<p>Up to 30' of custom quality cabinets & countertops; ceramic tile backsplash; island cabinet w/countertop; wall oven; cooktop; dishwasher; custom range hood; garbage disposal; sub zero refrigerator; stainless steel sink.</p>
